DRILL

Article No. 06202-1100 / 06202-1101 (with pigment pre-treatment)

“Drill is a diagonal-weave fabric with very pronounced diagonal rib surface effect.”

Despite the robust weave, the fabric does not lose its smoothness and draping ability. The twill line is still strongly visible even after printing. The “Drill” has all the beneficial properties of pure cotton products: breathability, good moisture absorption and it is all-round skin-friendly handfeel.

Applications

Shirts, Skirts, Pants, Accessories, Bags, Deco, Cushions

Facts

Composition	100 % Cotton
Construction	Woven, Drill 3/1
Width brutto	141 cm (± 2cm) ¹
Weight	230 g/m ² (± 5%) ¹
Selvedge	tuck-in, 1,5 cm
Abrasion resistance	18.000 cycles (Martindale, EN ISO 12947-2)

¹ Tolerance, due to the stretchable construction of knitted fabrics.

Care label

Please wash separately!

Printing on Textile Guide

https://bergertextiles.com/wp-content/uploads/2022/11/Printing-on-textile-DE-EN_21x11cm.pdf

***Important: Always perform print test!** Many parameters influence the print result: printer, type of ink, textile, room climate, intended use and much more. An ideal print result can only be achieved in combination. That is why we at **berger**textiles recommend only the printing processes for a product that will achieve the best results. The recommendations are the result of intensive print tests and must meet the highest demands in terms of print quality. Often it is also possible to print the textiles with other printing processes. In these cases, the individual requirements and technical possibilities are very important. All technical information was determined according to the current state of measurement technology and reflects the values of the test sample. Despite the highest quality standards, there may be deviations in production technology – all information is not legally binding and without guarantee.
