Sweat

85% Cotton
15% Polyester

SWEAT

Article No. 06107-1201

“Sweat is a special knitted fabric where an additional thread is carried along. On the face side a right stitch pattern is visible and on the back side soft loops are created.”

Depending on the application loops can be roughened, for example for warm keeping hoodies. During digital printing, the roughened side is a major problem, which is why “Sweat” keeps the unroughened back side.

Facts

Composition	85% Cotton, 15% Polyester
Construction	Knitted, 3-Thread Molton
Width ¹ brutto	161 cm
Weight	325 g/m ²
Selvedge	glued selvedge, 1,5 cm

¹ Due to the stretchable construction of knitted fabrics, deviations of +/- 2cm may occur.

Applications

Hoodies, Sport Shirts, Dresses, Sweatpants, Headbands, Beanie, Pyjamas

Care label

Please wash separately!

Printing on Textile Guide

https://bergertextiles.com/wp-content/uploads/2022/11/Printing-on-textile-DE-EN_21x11cm.pdf

***Important: Always perform print test!** Many parameters influence the print result: printer, type of ink, textile, room climate, intended use and much more. An ideal print result can only be achieved in combination. That is why we at **berger textiles** recommend only the printing processes for a product that will achieve the best results. The recommendations are the result of intensive print tests and must meet the highest demands in terms of print quality. Often it is also possible to print the textiles with other printing processes. In these cases, the individual requirements and technical possibilities are very important. All technical information was determined according to the current state of measurement technology and reflects the values of the test sample. Despite the highest quality standards, there may be deviations in production technology - all information is not legally binding and without guarantee.
