Satin

100 % Cotton

## SATIN

Article No. 06205-1100 / 06205-1101 (with pigment pre-treatment)

“A satin-weave construction can transform the appearance of cotton, providing it with greater structure and sophistication.”

The atlas weave chosen by bergertextiles makes mostly the warp threads visible on the surface of the fabric, which are pushed together tightly. This creates a shiny face side with an exceptionally beautiful drape. Only the finest yarns were used to produce the “Satin” fabric. In combination with an optimized set of weaving, a soft and at the same time strong material was created.

### Applications

Deco, Cushions, Bed linen, Curtains,  
Dresses, Skirts, Blouses

### Facts

Composition	100 % Cotton
Construction	Woven, Atlas 4/1
Width brutto	152 cm (± 2cm) <sup>1</sup>
Weight	120 g/m <sup>2</sup> (± 5%) <sup>1</sup>
Selvedge	tuck-in, 1,5 cm

<sup>1</sup> Tolerance, due to the stretchable construction of knitted fabrics.

### Care label

Please wash separately!

### Print technology

### Features

Organic  
certified by CU 1018427

Printing on Textile Guide

[https://berbertextiles.com/wp-content/uploads/2022/11/Printing-on-textile-DE-EN\\_21x11cm.pdf](https://berbertextiles.com/wp-content/uploads/2022/11/Printing-on-textile-DE-EN_21x11cm.pdf)

**\*Important: Always perform print test!** Many parameters influence the print result: printer, type of ink, textile, room climate, intended use and much more. An ideal print result can only be achieved in combination. That is why we at bergertextiles recommend only the printing processes for a product that will achieve the best results. The recommendations are the result of intensive print tests and must meet the highest demands in terms of print quality. Often it is also possible to print the textiles with other printing processes. In these cases, the individual requirements and technical possibilities are very important. All technical information was determined according to the current state of measurement technology and reflects the values of the test sample. Despite the highest quality standards, there may be deviations in production technology – all information is not legally binding and without guarantee.
