

# Aero

Art.No. 03705-0006-G

Aero, formerly known as G-Airtricot is soft, crease resistant and does not fray. The oval hole structure increases the resistance and air permeability of the flag fabric. The motives are pictured in exactly the same way as on ordinary flag fabric. The holes become invisible at a distance of only a few metres. **berger**textiles offers matching Beachflag belt strong for the pole cover.

## Applications

• Beach Flag • Flag • Banner

## Features

## Print technology\*

## Facts

Material	100 % Polyester, Knitted
Width	61", 73" 99" and 122"
Weight	3.24 oz/yd <sup>2</sup>
Thickness	300 μ
Transmission	71,3 %
Air permeability	4150 mm/s
Shrinkage	Length < 2,0%, Width < 1,0 %
Calender	195 °C, 42 Seconds

Printing on Textile Guide

<https://bergertextiles.com/wp-content/uploads/2022/11/Printing-on-textiles-ENG-online.pdf>

**\*Important: Always perform print test!** Many parameters influence the print result: printer, type of ink, textile, room climate, intended use and much more. An ideal print result can only be achieved in combination. That is why we at **berger**textiles recommend only the printing processes for a product that will achieve the best results. The recommendations are the result of intensive print tests and must meet the highest demands in terms of print quality. Often it is also possible to print the textiles with other printing processes. In these cases, the individual requirements and technical possibilities are very important. All technical information was determined according to the current state of measurement technology and reflects the values of the test sample. Despite the highest quality standards, there may be deviations in production technology - all information is not legally binding and without guarantee.
