**BE PART OF
THE CHANGE**

The Sustainable Keder

WE BELIEVE IN A BETTER WORLD

Every company must be sustainable because there's no Planet B. We are aware of our environmental impact; that's why **ked.eco is the trailblazer eco-friendly solution** that answers the sector's concerns.

A redoit product

The eco revolution to silicone keder

Say goodbye to silicone keder and welcome to ked.eco, the sustainable alternative to silicone or PVC.

100% Green

Recycled, recyclable, recycled, recyclable... It never ends! We take all polyester textiles and turn them into recyclable products, creating a sustainable story.

Double Value

Who said sustainability had to be expensive?

Get the best product quality while contributing to a greener planet.

Easy

Packed in reels. Seamless transition from silicone to sustainable.

No need for new machinery. It's a no-brainer!

100% RECYCLED RECYCLABLE

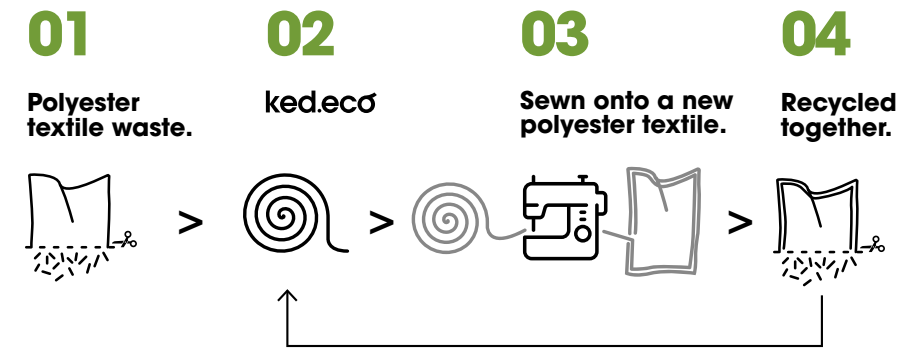

ked.eco is a game changer

Our mission in ked.eco is to give polyester textiles a **second lease on life**.

But our vision is bigger. We want to transform the printed polyester textiles into a **zero-waste** circular product.

250 lm package consists of 10 rolls of 25 lm

ked.eco lifecycle

Ked.eco is made from recycled polyester textile and it's recyclable to make ked.eco again and again.

Your textile waste becomes ked.eco. No matter the ink used to print your polyester textiles.

Thanks to its innovative texture, ked.eco can be used in your current sewing machinery. No need to change or upgrade.

No need to separate! Your textiles with ked.eco can be recycled together.

New patent

Key facts

100%

of the textile waste we receive from our clients, we can recycle it.

250

lineal meters

per package. Lightweight yet resistant material.

0%

amount of waste: We reduce. We recycle. We reuse.

100%

of ked.eco material comes from previously used materials.
